SECTION 1 — HERO

For Multi-Clinic ABA Operators.

Controlled Environments for Growing ABA Organizations.

Your clinics shouldn't be another thing you have to manage.

- Your standards are clear. The execution isn't always consistent.
- What happens at one center doesn't always happen at the next.
- You're ready for a partner who understands ABA, takes ownership, and gets it done.

[Client/operator headshots]

SECTION 2 — THE PROBLEM

BUILT FOR GROWING ORGANIZATIONS

One clinic is manageable.

Ten clinics are a system.

More centers mean more people, more vendors, and more opportunities for standards to drift.

We build the consistency behind your clinics so the standard doesn't depend on who's working that night.

Clean. Stocked. Ready. Every center. Every morning.

SECTION 3 — WHAT WE DO

WHAT WE DO

We take ownership of the environment.

Clean

Daily clinical cleaning built around ABA operations.

Inspect

Regular quality control catches problems before your team does.

Correct

When something isn't right, we fix it.

Communicate

You know what's happening without having to chase us.

You run the clinics.

We make sure they look like it.

SECTION 4 — PROOF

FROM YOUR PEERS

Don't take our word for it.

[OPERATOR TESTIMONIAL VIDEO]

“Not having to worry about how clean our clinic is or the quality of cleanliness has been a huge lift, both for me and for my team.”

SECTION 5 — CASE STUDY

ABA PORTFOLIO | MICHIGAN

14 clinics.

One standard.

Gateway Pediatric Therapy

Gateway operates 14 clinics across Michigan. We've supported their portfolio since 2018 as they've grown and expanded.

The assignment has remained the same:

Keep every clinic ready without leadership having to manage the cleaning.

TEXT CTA: READ THE GATEWAY CASE STUDY →

SECTION 6 — CLOSE

PARTNERSHIP

We work with multi-clinic ABA organizations that expect things to get done.

If you're looking for the lowest cleaning bid, we're probably not the right partner.

If you want consistent clinics, clear accountability, and a team that takes ownership of the outcome, let's talk.

PRIMARY CTA: APPLY FOR ONBOARDING

SECONDARY TEXT CTA: NOT READY? REQUEST AN OPERATOR REVIEW →

PAGE 2 — HOW IT WORKS

SECTION 1 — HERO

HOW IT WORKS

From first clinic to portfolio-wide control.

We don't just assign cleaners to your centers.

We build the operating system behind the environment—then manage it for you.

PRIMARY CTA: APPLY FOR ONBOARDING

SECTION 2 — THE PROCESS

THE PROCESS

Four steps. One accountable partner.

01 — Diagnostic Assessment

Understand the portfolio.

We learn your centers, current cleaning setup, recurring problems, internal expectations, and the standard you're trying to maintain.

Before we change anything, we understand what needs to work.

02 — Stabilization

Get the environment under control.

We establish crews, correct immediate issues, build backup coverage, align expectations, and stabilize day-to-day execution.

The goal is simple:

No surprises when your centers open.

03 — Standardization

Make the standard repeatable.

Cleaning protocols. Supplies. Communication. Quality control. Escalation. Accountability.

We create a consistent operating standard across the portfolio so quality doesn't depend on the individual cleaner or center.

04 — Continuous Oversight

Keep it that way.

We inspect. We communicate. We correct.

When something slips, our job is to catch it and solve it—not wait for your leadership team to manage us.

You shouldn't have to manage the people you hired to take something off your plate.

SECTION 3 — WHAT WE MANAGE

ONGOING OVERSIGHT

One partner responsible for the outcome.

Daily janitorial cleaning
Quality-control inspections
Crew management
Backup coverage
Supply management
Issue correction
Escalation
Periodic floor and carpet care
Window cleaning
Outbreak response
Emergency needs

You have one standard.

We manage what it takes to maintain it.

SECTION 4 — ONBOARDING

THE TRANSITION

We take over without creating another problem for you to manage.

Once we understand the portfolio, we build the transition around your centers, your schedules, and your operating requirements.

Crews are established.

Expectations are documented.

Backup coverage is built.

Communication is defined.

Quality control begins.

Then we take responsibility for keeping the system running.

The goal isn't a successful first week. It's a standard that holds.

SECONDARY CTA: REQUEST AN OPERATOR REVIEW →

SECTION 5 — CLOSE

Clean isn't complicated.

Consistency is.

That's what we're built to manage.

PAGE 3 — OPERATOR REVIEW

SECTION 1 — HERO

OPERATOR REVIEW

Before you change anything, let's look at what you have.

If cleaning across your portfolio requires too much oversight, produces inconsistent results, or keeps finding its way back onto your team's plate, we'll help you identify why.

REQUEST AN OPERATOR REVIEW

SECTION 2 — WHAT WE REVIEW

A SECOND SET OF EYES

Find where the system is breaking down.

We'll look at how environmental services are currently being managed across your organization, including:

Standards

Is the expectation actually clear and repeatable across centers?

Execution

Are centers consistently receiving the service they're supposed to receive?

Accountability

Who catches problems—and who owns fixing them?

Coverage

What happens when someone calls off or a crew doesn't show?

Oversight

How much internal leadership time is being spent managing cleaning?

Scalability

Will the current system still work as you add centers?

SECTION 3 — THE PROMISE

This isn't a sales ambush.

You don't need to be ready to switch providers.

You don't need to know exactly what the problem is.

We'll look at the current setup with you, identify what we'd pay attention to, and tell you where we think the system can be stronger.

If We Clean ABA is a fit, we can talk about that.

If not, you'll still leave with a clearer picture of what needs to improve.

FORM CTA: REQUEST MY OPERATOR REVIEW

No commitment. No portfolio-wide proposal required. Just a conversation about what's working, what isn't, and what we'd do differently.

PAGE 4 — APPLY FOR ONBOARDING

SECTION 1 — HERO

ONBOARDING

Let's see if we're a fit.

We partner with a limited number of growing, multi-clinic ABA organizations each year.

If you're looking for a team to take ownership of the environment across your centers, tell us a little about your organization.

SECTION 2 — FIT

WHO WE'RE BUILT FOR

We Clean ABA may be a fit if:

You operate multiple ABA centers.

You expect consistency across the entire organization.

You're tired of leadership managing cleaners, vendors, and recurring issues.

You care about how your centers feel to staff, families, and visitors.

You value accountability more than simply finding the lowest bid.

And you're looking for a partner who will **own the outcome**.

What isn't working with your current setup?

What would a successful partnership look like to you?

When would you ideally like to make a change?

Anything else we should know?

FORM CTA: SUBMIT FOR REVIEW

We review every application personally. If there appears to be a fit, we'll reach out to schedule a conversation about your portfolio.

SECTION 4 — WHAT HAPPENS NEXT

AFTER YOU APPLY

No drawn-out sales process.

If there appears to be a fit, we'll schedule a conversation to understand your portfolio, your current setup, and what needs to change.

From there, we'll determine scope, build the operating plan, and map the transition.

If we're the right partner, we'll tell you what moving forward looks like.

If we're not, we'll tell you that too.

SECTION 5 — CLOSE

Your clinics should reflect the standard of care happening inside them.

Let's make sure they do.

SUBMIT YOUR APPLICATION ↑

PAGE 5 — GATEWAY CASE STUDY

SECTION 1 — HERO

ABA PORTFOLIO | MICHIGAN

14 clinics.

One standard.

Gateway Pediatric Therapy × We Clean ABA

Serving the portfolio since 2018.

SECTION 2 — CONTEXT

THE ORGANIZATION

Growth changes the cleaning problem.

Gateway Pediatric Therapy operates 14 clinics across Michigan, representing more than 90,000 square feet of active treatment space.

As an ABA organization grows, cleaning stops being a building-level problem.

It becomes an operating-system problem.

Different centers.

Different buildings.

Different crews.

Different nightly conditions.

But one organization—and one standard to protect.

SECTION 3 — THE ASSIGNMENT

THE ASSIGNMENT

**Keep every clinic ready without leadership
having to manage the cleaning.**

That means more than sending someone with a mop.

It means dependable staffing, clear expectations, quality control, communication, backup coverage, correction, and accountability across the portfolio.

The standard has to survive scale.

SECTION 4 — THE PARTNERSHIP

SINCE 2018

The portfolio changed.

The responsibility didn't.

As Gateway grew, opened centers, changed facilities, and evolved operationally, We Clean ABA continued supporting the environment behind the organization.

Our responsibility remained simple:

Make sure the clinics are ready for the people walking into them tomorrow.

SECTION 5 — TESTIMONIAL

FROM THE OPERATOR

[GATEWAY TESTIMONIAL / VIDEO]

“Not having to worry about how clean our clinic is or the quality of cleanliness has been a huge lift, both for me and for my team.”

SECTION 6 — CLOSE

14 clinics don't need 14 different standards.

They need one system responsible for maintaining the standard across all of them.
